Adobe Illustrator/Photoshop.

SOFTWARE ENGINEERING PARADIGMS:

Object Oriented Design,
Test Driven Development,
Agile Methodology.

EXPERIENCE

Web Developer

Video Audio Synthesizer: Web App

06/2019

- Created a Video Audio Synthesizer web app using JavaScript, HTML, CSS - Github Link.
- Displayed with a black screen background, hit any alphabet key for animation to appear and play unique sound.
- Used JavaScript libraries paper.js for animations/graphics, and howler.js for playing sounds.

Software Developer - Database Intern

University of Houston - Division of Research

07/2018 to 12/2018

- Designed and developed database for Strategic Communications Team to market the University Research Publication.
- Designed database schema using mySQL workbench for relational database to store large dataset containing 1000+ rows.
- Suggested and wrote complex queries in mySQL to customize data retrieval to help form future research partnerships with research leaders within US. Developed using mySQL.

Software Engineer Generalist/SDET

grüv. - Habit Tracker iOS App

09/2018 to 12/2018, 09/2018 to 12/2018

- Collaborated with 4 engineers to Develop a Habit Tracker app in Swift on Xcode to track user's habits based on regular input.
- Used UITableView from UIKit and CardViewList in Swift to populate Habit categories and Habits onto Views.
- Wrote UI and Functional Tests for essential UI elements using XCTest framework from Apple to ensure low error rate.

UX Researcher/Designer

DietAR - Augmented Reality Diet Assistant

08/2018 to 12/2018

- Collaborated with three engineers to develop an MVP within a fast-paced 4-month sprint. Conducted user interviews with 20+ working professionals to identify customer prole and target specific problem space.
- Designed app mockups using Adobe Photoshop and Illustrator for MVP.

Android Developer & Instructor

Google Applied CS Workshop – CougarCS

04/2018 to 05/2018

- Facilitated and lead a 3 day Google Applied CS Workshop on Android Development that included over 30 students.
- The workshop centered on making an Android game called Word Stack that used the stack data structure and the drag and drop functionality. The game was developed on Android Studio and was programmed using Java.

Web Developer

Color Game : Web App

06/2019

- Color Guessing Game application developed using HTML, CSS, Javascript - Github Link.
- The Game: Displayed by a set of colors and a RGB color description. You should guess what color is the RGB color.

LEADERSHIP & COMMUNITY

The Learning Experience - Instructor

04/2019 to 02/2020

- Work as an instructor for elementary school students, teaching and conducting activities in topics of Math and Computer Science.

ACM - CougarCS at University of Houston - Treasurer

05/2018 to 12/2018
